Hodges Library
Copyright & Attribution Packet

Purpose: This packet is a copy/paste-ready set of pages you can insert into the Hodges Discovery Library, Hodges Cipher Library, and related codex documents to establish authorship, rights, and attribution. Informational only; not legal advice.

1) Copyright Page (Template)

Paste this near the front of any Hodges Library / Codex document.

2) Intellectual Property Ownership and Rights Notice

This document and all associated materials, including but not limited to written content, frameworks, symbolic systems, ciphers, diagrams, naming conventions, organizational structures, methodologies, explanatory texts, derivative expressions, versions, and revisions (collectively, the "Work"), are the original creation and intellectual property of Evan Nicholas Hodges (the "Author").

The Work is protected under applicable United States and international intellectual property laws, including but not limited to copyright law, trade secret law, and unfair competition doctrines.

All rights, title, and interest in and to the Work are exclusively retained by the Author. No part of the Work may be copied, reproduced, distributed, published, transmitted, displayed, sublicensed, commercialized, reverse engineered, adapted, or used to create derivative works without express written consent.

The Work is maintained as private, non-public intellectual property. Unauthorized use or misrepresentation may constitute infringement.

3) Copyright-Ready Public Disclosure & Scope Statement (Template)

Use this when you want to publicly describe the work (e.g., GitHub README, public PDF cover letter) without revealing private mechanics.

Work Title: _____

Version: _____

Authorship: Made by Evan Nicholas Hodges

Status: Private, pre-publication intellectual work

1. Description of the Work (Public-Safe)
[1–2 paragraphs describing the purpose and nature of the framework, without operational detail.]

2. Nature of the Work
This work constitutes a literary and conceptual system expressed through original text, terminology, structure, and authored explanation. Protection is claimed over the specific expression, organization, language, and presentation.

3. Scope of Public Disclosure
Only high-level identification details are disclosed. No implied license or public reuse is granted.

4. Reserved and Undisclosed Elements
Internal symbolic structures, mapping logic, diagrams, generative rules, and implementation mechanics remain reserved and may remain private and undisclosed.

5. Derivative Works and Versioning
This version is version-locked. Future versions are derivative works unless otherwise stated by the Author.

6. Rights Statement

4) U.S. Registration Checklist (Informational)

Key points:

- Copyright protection generally exists once an original work is fixed in a tangible form.
- Registration is voluntary, but is commonly used to create a public record and is required to bring an infringement lawsuit for a U.S. work in many circumstances.
- If registration occurs within the relevant window after publication, additional remedies like statutory damages and attorney's fees may be available in successful litigation (check current rules).

Practical steps (high level):

1. Export a clean PDF of the exact version you want to register and keep the source files.
2. Create a simple version log (date, version, what changed).
3. Register online via the U.S. Copyright Office eCO portal, pick the most appropriate category (often 'Literary Work' for documents), complete the application, pay the fee, and submit the required deposit copy.
4. Keep the confirmation email/receipt and the issued registration certificate with your archive.

Evidence trail (recommended):

- Maintain dated exports (DOCX + PDF) for each released version.
- Generate SHA-256 hashes for each release file and store them with a manifest.
- Store your originals in two places (local + secure cloud/drive).
